DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 64-74, drawn to a method of forming a wound dressing.

Group II, claims 75-80 and 91, drawn to a wound dressing and kit.

Group III, claims 81-84, drawn to a method of forming a protein polymer.

Group IV, claims 85-90, drawn to a protein polymer.

Group V, claims 92-97, drawn to a method of treatment.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature among the inventions is the protein polymer, which lacks an inventive step as evidenced by Gagnieu (U.S. Patent No. 5,412,076; Issued May 2, 1995) in view of Tammishetti *et al.* (International Publication No. WO 99/66964; Published Dec. 29, 1999). Specifically, Gagnieu teaches crosslinking collagen, but not albumin, with dicarboxylic acid reagents (abstract; column 5, lines 16-27 and 37-40) to form polymers useful in dressings (column 11, lines 16-18). However, Tammishetti *et al.* teach that carbodiimide cross-linked albumin is useful in surgical sealants (i.e. dressings)

Art Unit: 4161

(abstract; page 3, lines 15-23). Since albumin was known in the art as a useful protein to crosslink for use in a dressing, it would be obvious to one of ordinary skill in the art to substitute albumin for the collagen of Gagnieu. Thus, the protein polymer (i.e. the common technical feature among the Groups) lacks an inventive step and cannot be considered a special technical feature as defined under PCT Rule 13.2, Part I (b). Thus, the Groups do not share a common special technical feature and are subject to restriction.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

5. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the

Art Unit: 4161

requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
